

Vendor Helper

Features

1.Forecast Viewing Functionality

- A feature where vendors can view a basic list of upcoming demand forecasts for the next quarter.
- Forecasts are displayed in a simple table format showing product name, expected quantity, and forecast date.

2.Order Adjustment Request Submission

- A form where vendors can submit adjustment requests for existing orders.
- The form includes fields for order reference, requested adjustment, and a simple text box for additional comments.
- Submissions generate an automated email notification with a reference to the record to 'Fatmug Designs' procurement team.
